Introduction

Our project for this course Object-Oriented Programming comprises of an interface portal that a valid Dealership can use to sell, acquire and appraise arms and ammunition.

We have used to the concepts of object oriented programming such as inheritance, polymorphism, composition etc. To put together a set of classes and functions for this purpose. A customer can enter his details and get started with this easy to use interface. He/She can choose to buy, sell or get his own Armament appraised. The dealership deals in three different kinds of guns, mainly Shotguns, Pistols and Rifles of different kinds. The Dealership also sells appropriate ammunition for those guns.
